

DRY FIX CONTINUOUS VERGES FOR SLATE

30 YEAR GUARANTEE

The continuous verge range are made up of preformed GRP continuous profiles designed to be used with natural or man-made slates. Designed to fix continuously along the verge with under batten fixing for new projects and face fixing for refurbishment work.

FEATURES AND BENEFITS

- Quick and simple to install
- Thermally stable
- UV and acid rain resistant
- Lead alternative
- Reduced theft risk
- Creates no harmful run off into water courses
- Dry fix products eliminate the mortar installation and maintenance issues

MATERIAL AND COLOUR

GRP and Anthracite

TYPICAL DRY VERGE JOINT DETAILS

<p>RIDGE JOINT</p> 	<p>Ridges</p> <p>The Dry Verges are cut with a vertical mitre and butt jointed. A lead saddle may be fitted under or over the joint if required. The ridge tile should be trimmed if necessary to suit.</p>
<p>VERGE JOINT</p> 	<p>Verge.</p> <p>Where joints in the dry verge are required along the edge of the roof, they should be overlapped with the lower section fitted over/around the upper section.</p>
<p>SPROCKET JOINT FIG.1</p> 	<p>Sprockets</p> <p>Slight or gentle sprockets can easily be accommodated by cutting the lower section to a slight rake and fitting over the upper or main dry verge section.</p>
<p>SPROCKET JOINT FIG.2</p> 	<p>These jointing methods are suitable for all of the dry verge profiles.</p>

PRODUCT CODES AND SUITABILITY

Product code: HDL DV6
Slate gap: 40mm
Length: 3000mm
 Designed to fit underneath the slating battens. Suitable for slate roofs both new and refurbishment work.

Product code: HDL DV7
Slate gap: 16mm
Length: 3000mm
 Designed to fit underneath the roofing underlay and directly on top of the sark boarding in a typical Scottish roof detail.

Product code: HDL DV8
Slate gap: 55mm
Length: 3000mm
 Designed primarily for face fixing as a refurbishment system but can be used on new build if required.

Product code: HDL DV9
Slate gap: 35mm
Length: 3000mm
 Designed primarily as a refurbishment system but can be used on new build if required and where the slates are fixed directly to the sark board roof in typical Scottish slating practice.
