

WELCOME TO SIG ROOFING

SUPPORTING

THE CONSTRUCTION INDUSTRY
WITH ROOFING MATERIALS, PRODUCTS AND ADVICE

WHATEVER YOU REQUIRE,
WE CAN SUPPLY IT.

ROOFING

IT'S JOB DONE

WORKING FOR YOU

When you need a dedicated supplier for roofing products, technical advice and support, you need a distributor with a service that fits with your needs.

ESTIMATION

We provide professional, accurate and reliable estimating;

- **Full Take-offs**
- **From drawings or dimensions**
- **Detailed with all listed components**
- **Based on manufacturer specifications**

Your local SIG Roofing team are both passionate and knowledgeable.

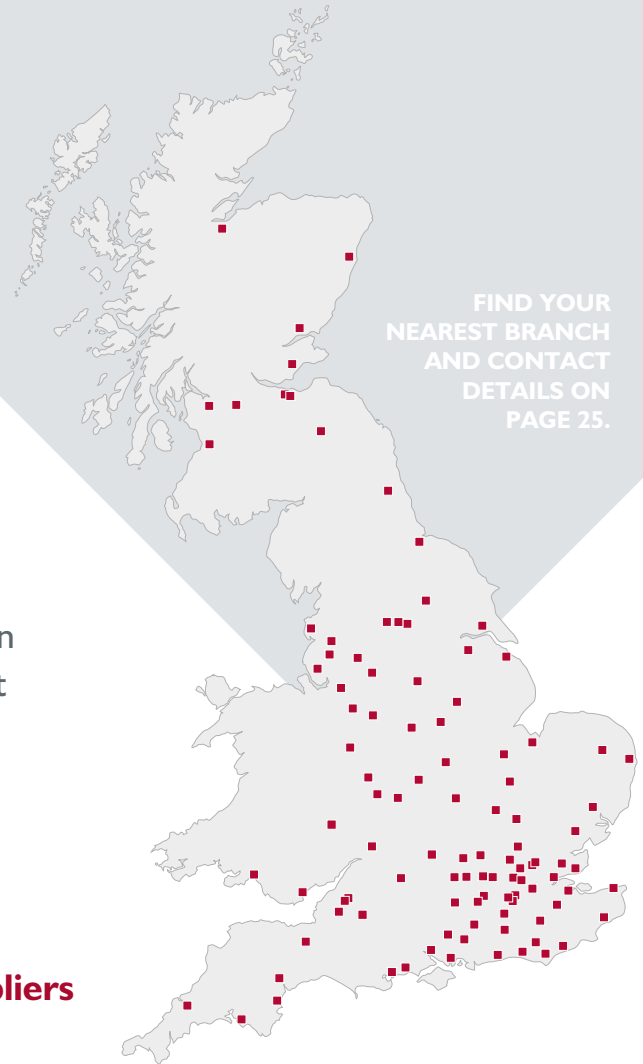

We're here to help you find the right products:

- **Specialist in pitched, flat and industrial roofing products**
- **Over 250,000 roofing products**
- **Excellent trading relationships with all the leading manufacturers**
- **Over 180 delivery vehicles ensuring reliable deliveries**
- **Expert advice and support**
- **Branches nationwide with roofing products always available and always in stock**
- **Dedicated central sales office with estimating and direct order taking**
- **Sample and matching services**

PARTNERSHIP BENEFITS

Whatever you require, we can supply it.

FIND YOUR
NEAREST BRANCH

WHY CHOOSE SIG ROOFING?

With over 60 years' experience we understand your challenges and work to deliver the most value for you.

Peace of mind

SIG Roofing is an active member of National Federation of Roofing Contractors (NFRC) and The Metal and Cladding Association to name but two. We are focused on Health & Safety, quality assurance and continuous improvement in working practices.

Simplicity

We take the complication out of sourcing roofing materials, with everything you need to complete a job.

Transparency

Our costs are fully transparent and charged as per agreed terms with you.

Flexibility

Whether you have an account or cash trade with us, our branches support your buying needs.

Support

We provide support and advice throughout your project, from planning through to completion.

Stability

Being part of a FTSE 250plc, our financial stability ensures your projects are in a safe pair of hands.

Value for money

Our buying power gives you access to quality manufacturer products and our accredited own brands all at the best prices in the market.

Quality

Every single product supplied by us is covered by 'SIG Assured' ensuring that all of the products we stock meet essential regulatory compliance from CE Marking to Restriction of Hazardous Substances (RoHS), Conflict Minerals and Modern Slavery.

ESTIMATING QUOTATION ORDERING DELIVERY

SERVICES YOU CAN RELY ON

ONE Warranty

The ONE Warranty scheme is a free to use product warranty for the complete build-up of your roofing projects.

- 15 year product warranty scheme
- Covers all the products in a complete roof build up
- One stop warranty shop
- Suitable for flat & pitched roof build ups

Flexible Deliveries

Our vehicles fitted with mechanical handling equipment, help speed the process of off-loading and reduce potential risk of injury and stock damage. With an extensive fleet of vehicles ranging from small vans to large trucks, we send the appropriate vehicle to suit a specific order and ease of access to the site, ensuring on time delivery when you need it.

Core Range

With our Core Range you can be confident that the essential products you need will be in stock and ready for delivery or collection EVERY DAY.

Trade Club

As a member of Trade Club you get points when you purchase your roofing products and receive £25 vouchers every month when you reach the appropriate level.

- **Collect 1 point for every £1 you spend**
- **Earn double points on specified products**
- **Spend your vouchers in branch**

Want to know more? Please visit the website for additional information, registration and downloads on all these services.

DATAAC

Become a Design And Technology Accredited Contractor (DATAAC). Being a DATAAC member helps you have a real competitive edge. You get exclusive access to our specialist range of products, systems and guarantees - such as back-to-back warranties on products and workmanship - that aren't available to other contractors.

ROOF COVERINGS

Whether it's concrete, fibre cement or even fibre glass, man made tiles are a durable alternative to traditional materials offering excellent quality and value for money.

Concrete tiles are the most widely used and readily available roof covering. Strong and designed to perform in even the most demanding British weather conditions they are a cost-effective solution. Our wide range of concrete tiles and accessories come in a variety of profiles, colours and sizes.

PROFILE	Standard Pattern	Pantiles	Metric Square Profile	Metric Standard	Double Pantile	Double Roman	Regent
SIZING	15" x 9"	Various	Metric	Metric	Metric	Metric	Metric
							
PROFILE	Double Plain Tile	Flat Metric	Flat Split Metric	Thin Leading Edge	Thin Leading Edge Split	Thin Leading Edge Riven	Thin Leading Edge Riven Split
SIZING	Metric	Metric	Metric	Metric	Metric	Metric	Metric
							

We supply tiles and accessories from all the leading manufacturers including;

HERITAGE REPRODUCTION STONE

Hand crafted to give an authentic roofscape, offering detailed moulding, a choice of colours and a range of sizes designed as alternatives to traditional regional products.

COTSWAY

Matching the versatility and beauty of Cotswold stone roofing slates.

CHARNWOOD

20% lighter but equal in colour, texture and performance to East Midlands Swithland slate roofing.

RUTLAND

Another East Midlands favourite, Collyweston stone roofing slates are matched in colour, texture and performance.

HERITAGE RECLAIMED SLATE

A reproduction roof slate providing all the look and feel of weathered natural reclaimed slate but with a 25-year guarantee and no shortage of supply.

A hand-crafted, hand coloured slate using moulds from natural slate originals, available in two colours, in any quantity, requiring no sorting or grading. The glass fibre cement construction provides a light yet durable roofing slate material that weighs only 30kg/m².

FIBRE CEMENT SLATES

Smooth Square Edge fibre cement roofing slates are an ideal option if looking for a cost-effective alternative to natural slates.

Available in blue-black colour, conforming to the strongest class, class B in accordance with BS EN 492:2012+A1:2016, with a 10 year colour and 30 year structural stability guarantee.

We also supply a range of leading manufacturer Fibre Cement products and accessories to complete the roof.

ESTIMATING QUOTATION ORDERING DELIVERY

CLAY TILES

NATURAL SLATE CONSISTENT QUALITY, CONSISTENT SUPPLY

As the largest distributor of natural slate in the UK, quality is at the forefront of everything we do. We source our slates direct from the quarries, allowing us to guarantee the selection and continuous supply to you.

CONSISTENT SUPPLY

We carefully manage every single step of the journey, from the quarry to your premises. This monitoring and careful selection ensures that the slate we supply you is not only aesthetically beautiful and strong, but that you get consistency and traceability that's second to none.

The range provides high quality ranges with industry leading 30 to 75 year warranties, suitable for both new and refurbishment projects.

Our natural slate range benefits from:

- **Consistency of quality**
- **Longevity of supply**
- **Best value**
- **Choice and variety**
- **Traceability**
- **On site quality control**
- **Rapid and efficient logistics**

For detailed information visit our dedicated website: www.sigaslate.co.uk

CONSISTENT QUALITY

- All slates are tested to BS EN12326-1:2014 and test results are readily available
- All slates are CE Marked
- Every crate of slate is marked with EN test results

The range includes a wide variety of WI ($\leq 0,6\%$), T1, S1 slates to suit NHBC requirements.

EXCELLENCE

The finest slates from the most reputable quarries are selected to provide a long-lasting, roof with minimal grading and sorting. They all come with a 75 year warranty.

COMMERCIAL

A range of good quality slates with a 30 year warranty, ideal for new build projects, refurbishment and the volume developer market, complying with NHBS requirements.

CLASSIC

Affordable natural roofing slates of good overall quality that are ideal for budget conscious projects.

SNOWDONIA NATIONAL PARK AUTHORITY

ROOFLINE & RAINWATER

With the highest quality range of roofline and rainwater products, expertise and advice, you always get products manufactured to the highest specification.

CELLULAR

Our comprehensive ranges of PVC-UE soffit, fascia, cladding and window trims meet the criteria of BS 7619: 2010 and are available in a wide selection of sizes and colours (whites, wood grains and colours).

VENTILATION

Our range of quality roof ventilation products conforms to BS 5250: 2002 and are suitable for new build and refurbishment situations, including:

- Continuous soffit and fascia vents
- Cross flow panels
- Lap vents
- Eave protection and felt support trays
- Eave comb fillers
- Circular soffit ventilators

RAINWATER SYSTEMS

All our PVCu rainwater systems are manufactured and marked to British Standard Specifications and are suitable for all types of domestic, commercial and industrial buildings. PVCu systems have a number of advantages that make them a cost-effective solution to rainwater collection and drainage:

- Maintenance free with consistent finish and colour
- Tough, durable and lightweight for ease of installation
- Well-defined stylish contours ensure a seamless match with all styles of property, new or old

Every product quality checked

ESTIMATING QUOTATION ORDERING DELIVERY

FLAT ROOFING SYSTEMS

When working on flat roofing there are a range of product systems to suit every type, scale and finish. So whichever method of working is required, there are several options available. Below are our membrane products and overleaf liquid solutions to give you the right product for the job in hand.

SINGLE PLY MEMBRANES

Formed by laying and joining strong, flexible sheets to create a continuous waterproof barrier, single ply is applied cold and can be mechanically fixed, bonded or ballasted.

There are two types of single ply in our range:

PIB - made from synthetic rubber it can be installed directly over bituminous membranes and requires no hot work.

PVC - reinforced with polyester or glass fibre providing excellent strength, elongation and weathering characteristics.

REINFORCED SINGLE PLY

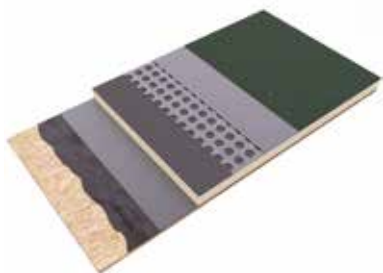

A synthetic rubber membrane with a polyester fleece laminated to the underside.

Easy installation with enhanced adhesion characteristics that the polyester fleece offers and pre-applied seam tape. The flexibility of the rubber membrane guarantees resistance against all extreme weather conditions, ensuring an outstanding flat roofing system.

TORCH ON FELTS

Our ranges include Cap Sheets, Underlays and Vapour Control Layers. With new membranes providing increased resistance to aging and weathering they continue to be suitable for all roof sizes, easy to install and low in cost. They can be the ideal choice for tailoring the build up to the project criteria.

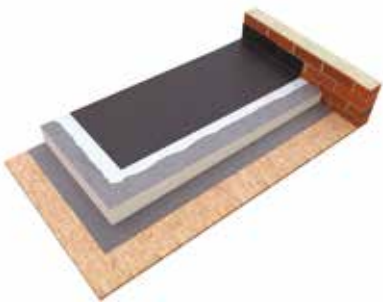

EPDM

Our EPDM roofing range includes a choice of membrane thicknesses, adhesives, trims and drainage accessories.

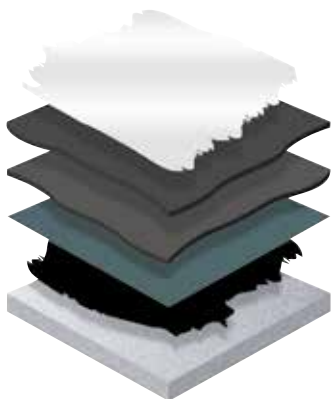

Depending on your requirements we can supply stock in either whole rolls or cut to the customers size.

With BroofT4 fire rating and +35 year BBA life expectancy making this the ideal choice for refurbishments and new build projects.

MASTIC ASPHALT

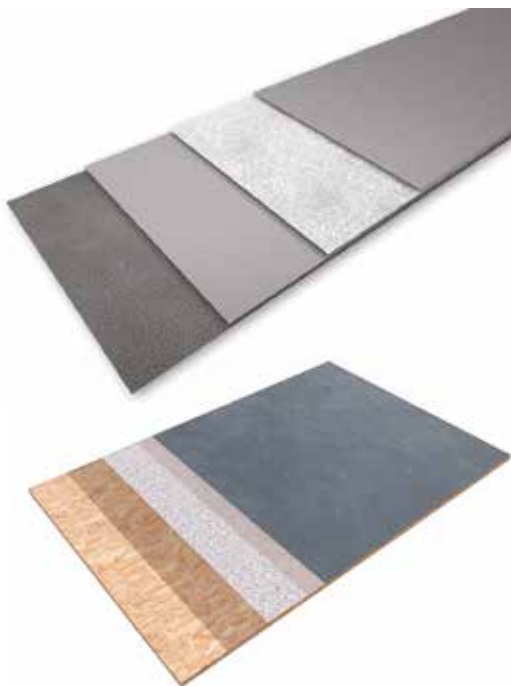

Modern mastic asphalt contains graded limestone aggregates bound together with asphaltic cement with highly advanced polymer formulations. Perfect for both new build and refurbishment it is spread by a hand float rather than rolled and can be laid on most types of rigid structure.

ESTIMATING QUOTATION ORDERING DELIVERY

FLAT ROOFING SYSTEMS

Liquid based solutions enable you to work around complex structures and obstacles, as well as undertake patching and repairs on existing coverings.

LIQUID WATERPROOFING

Our liquid waterproofing systems are simple to use straight from the bucket. Applied by brush, roller or spray they are ideal for flame-free application where access is limited or where large amounts of detailing are required.

GRP SYSTEMS

GRP (Glass Reinforced Plastic) is a high performance, proven technology found on everything from boats and water tanks to ponds and pools, keeping water in as well as out. Made in the UK, it's an environmentally safe composite and a great modern alternative to bitumen, felt and lead - perfect for creating flat roofs that are extremely strong, completely waterproof and long lasting.

REPAIR COMPOUNDS

Our Roof Repair System is a low odour, low VOC, solvent based acrylic resin system for use when waterproofing various roofing systems such as flat and pitched roofs, bituminous felt, asphalt, gutters, concrete, brickwork, metal surface.

PAINTS & PRIMERS

A range of easy to apply paints and primers, including:

- Felt Roof Adhesive
- Bitumen Primers
- Black Bitumen Paint
- Aluminium Paint
- All Weather Roof Coat

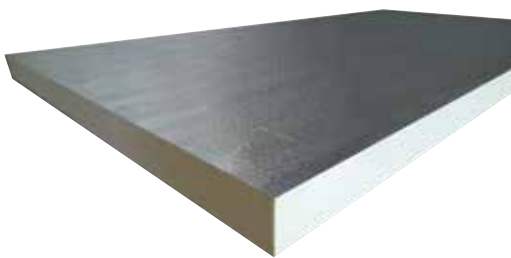

FIXER

ESTIMATING QUOTATION ORDERING DELIVERY

FLAT ROOFING ANCILLARIES

In addition to flat roof waterproofing options, we also stock the ancillaries needed to finish off your projects.

INSULATION

Ensuring you use the right insulation can be a minefield, with a vast choice of product ranges available, legislative and building requirements and new products constantly being introduced. We can advise you on the most appropriate ranges to stock.

STRUCTURAL DECKING

OSB is highly engineered, moisture resistant and specifically designed for the most demanding roofing applications. Perfect for cold or warm deck flat roofs it's easy to work with, simple to fix and cheaper than structural plywood.

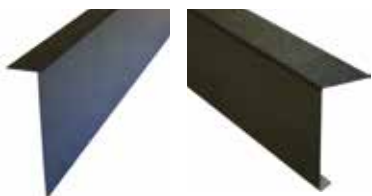

ROOF DOMES, LANTERNS, ROOFLIGHTS & ACCESS HATCHES

Adding light to a flat roof has become the norm for most projects. Quality specification modular glass rooflights are available to order in a wide range of sizes, supplied as fixed, or manually or electrically opening for ventilation. We also stock dome shape modular rooflights. Access hatches give easier access to flat roof spaces.

VENTS & OUTLETS

While the requirements for roof drainage will vary depending on the type of roof, our vents and outlets ensure a watertight connection between the water/damp proofing membrane and the drainage pipework.

TRIMS

Roof edge trims and termination bars tidy up waterproofing membranes on flat roofs and are available in a range of sizes in either GRP or aluminium. They're an alternative to lead flashing and extremely durable and economical.

FLASHINGS

Lead is the traditional material for this and is still one of the most popular methods of sealing the joint between walls and flat roofs.

Lead substitutes have become increasingly common and, depending on the life expectancy and budget of the job you are working on, they might be just what you need.

ESTIMATING QUOTATION ORDERING DELIVERY

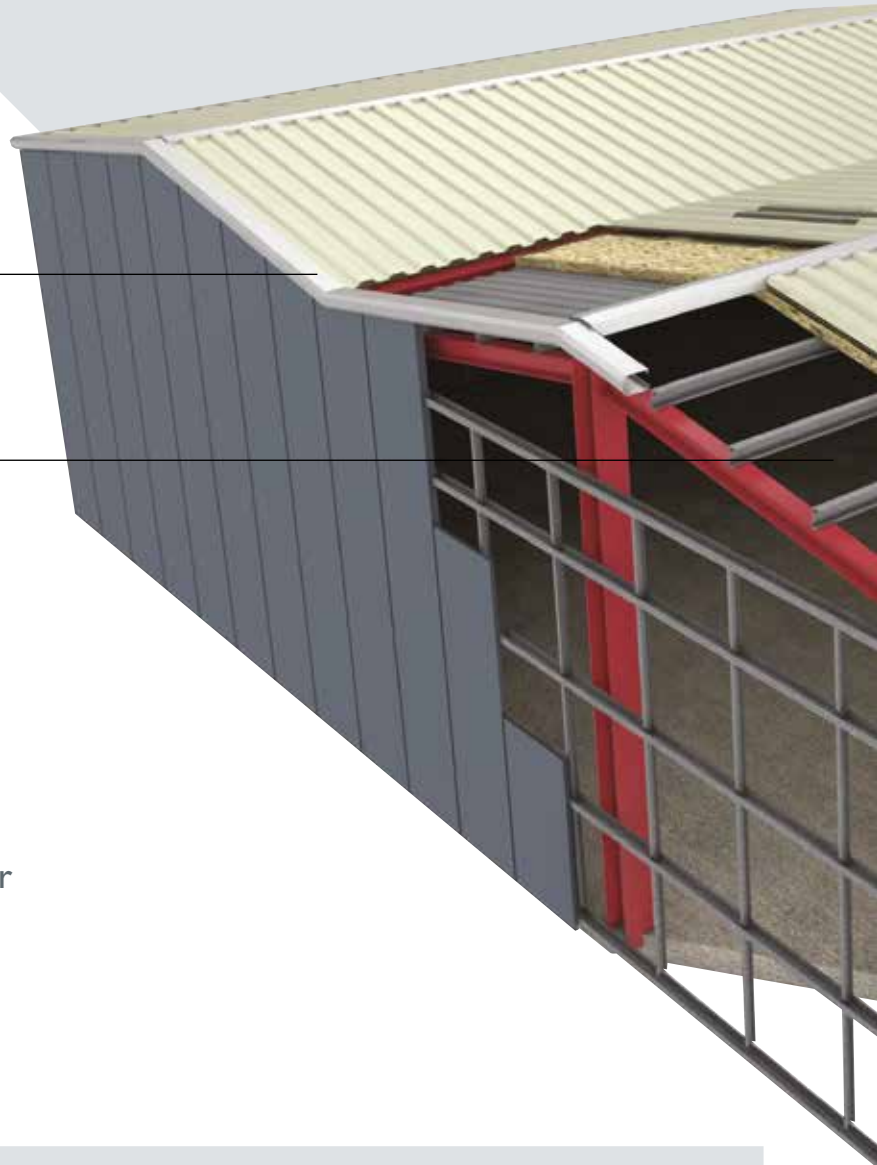

INDUSTRIAL ROOFING

We only work with, and supply quality materials from, leading manufacturers in the industry.

That way you can have total confidence in our products.

Flashings, Gutters & Fabrications

Purlins

Our unrivalled position in the industry means we can source many products in the marketplace, supplying either individual components or whole solutions. With our streamlined management approach, we simplify your buying process and co-ordinate site deliveries, including any specific off-load requirements you may have.

Our commitment is to ensure you can deliver your projects effectively.

INDUSTRIAL ROOFING

Working with our Industrial Roofing Specialist Centre means you draw on an extensive product range, impartial and informed technical support with consideration given to the full build package.

We can help you with;

- **Current legislation, standards and codes of practice**
- **Condensation risk & U-values**
- **Exposure & local climate requirements**
- **Roof loading & working safety**
- **Load out & supply chain management**
- **Component & product colour matching across systems and manufacturers**

Whatever challenges and opportunities present themselves, we have the breadth of range and agility of service that means we deliver to you what you need, when you need it.

FILON®

EUROCLAD

SINGLE SKIN METAL PROFILED SHEETING

Our comprehensive range of Single Skin Metal Sheeting is suitable for almost all roofing and cladding applications. We can also source more unusual or bespoke products on request.

BUILT UP SYSTEMS

You can also use single skin sheets together with liner panels and insulation to create a built up insulated roof/cladding system. We supply the whole range of products you need.

COMPOSITE PANELS

Composite roof and wall systems offer significant advantages over conventional site assembled systems, being fast, single-fix installation with reliable thermal performance through the continuity of the insulation and minimal air leakage.

TILE SUPPORT SYSTEMS

Slate and tile support systems provide a safe, weather tight, fast-build platform for the installation of roof tiles or slates with superior thermal performance and low air leakage. Rapid roof installation ensures a weather tight building, accelerating the start and completion of internal fit out.

CORRUGATED GALVANISED SHEETING

"Crinkly tin" provides a perfect, cost effective solution for agricultural buildings.

FIBRE CEMENT PROFILE SHEETING

We offer an unrivalled product portfolio of fibre cement sheeting, accessories and build up materials. We supply the full range of Marley Eternit profiled fibre cement sheeting in profile 3 and 6R.

In addition to your key industrial roofing materials, we also stock the ancillaries needed to finish off your projects;

- GRP Rooflights
- Purlins
- Flashings, Gutters & Fabrications
- Structural Decking Profiles

MATERIAL CALCULATIONS

We can help calculate material requirements from plans or dimensions you supply.

PROFILE MATCHING SERVICE

We will help you identify ANY industrial roofing profile. If we can't find an existing product we can arrange the manufacture to your specifications.

COLOUR MATCHING

Even if a mix of products have been used from different manufacturers, we help you match your products to an accurate colour finish, where possible.

FLASHING DETAILS

All flashings are purpose made to your specification and are compatible with coated steel and galvanised sheeting. Ask for our 'Flashing Details' calculation sheet to complete all the dimensions and angles you need.

ESTIMATING QUOTATION ORDERING DELIVERY

BUILDING A BETTER FUTURE

Knowing that you're working with a supplier that has a meaningful community strategy in place is critical in today's environmentally conscious times.

SIG Roofing is a responsible supplier constantly reviewing our role in society, and impact on the environment.

We have an Integrated Management System for Health, Safety and Environment, with certification to ISO 14001 (Environment) and OHSAS 18001 (Health and Safety).

As a member of the FTSE4Good index of socially responsible companies we include broader social and environmental issues into our decision-making. We believe this helps the group and our clients achieve their business goals.

We also have well-established relationships with Associations & Certification Schemes, working closely with trade associations.

At SIG Roofing, we play an active part in the industry and always take our stewardship role seriously - whether that's looking after our people, the environment, our partner businesses or our clients.
